

IMI is presenting its latest products and capabilities at MSPO 2013

Ramat Hasharon, Israel, September 3, 2013 - Israel Military Industries Ltd. (IMI) is attending the 21st MSPO International Defense Industry Exhibition, held in Kielce, Poland, September 2-5, 2013. IMI is located in Hall E, Stand 15 (E-15). On display are various offensive and defensive solutions suitable for the Polish Armed forces' modernization requirements. Among these:

- Two 120mm tank cartridges: the **M339** - a High-Explosive Multi-Purpose (HE-MP) tank cartridge for long-range engagement of targets such as Light Armored Vehicles (LAVs), bunkers and infantry, and the **M322** - a combat-proven Kinetic-Energy (KE) cartridge capable of defeating modern armor systems.
- An array of infantry weapon systems and solutions, including the **GMM120** - a precision-guided 120mm mortar bomb with a GPS and/or SAL (Semi-Active Laser) seeker - providing infantry with accurate "pocket artillery" and the **MPRS** - an advanced 40mm Air-Burst grenade rifle system, enabling improved lethality and effectiveness against various targets, both exposed and behind cover.
- Air-to-ground weapon systems and munitions: **MPR 500** - a combat-proven 500lb. multi-purpose rigid penetration and surface attack bomb with MK-84 effectiveness in MK-82 dimensions and **MARS** - a rocket-powered, long-range, precision weapon system for aerial salvo strike of a variety of

targets (communication installations, air force bases, air defense sites, logistics centers, etc).

IMI is highlighting its wide range of artillery rocket systems and projectiles, as well as several affordable, lightweight close air support munitions: **WHIP SHOT** – a 15kg precision strike weapon for light air support (LAS) aircraft and **FASTLIGHT 30/100** – a new family of long-range precision-gliding air-to-surface bombs with a highly-effective 3-mode fuze and a gliding range of more than 50 km.

Further on display are the company's latest aircraft survivability and protection solutions: **ADVANCED IR SPECTRAL DECOY FLARES** for fixed-wing and rotary combat aircraft and the **MINI-SAMP** – a new Mini Countermeasures Dispenser System and Mini IR Decoy Flare, capable of defeating most modern IR-seeking MANPADS and air-to-air missiles using 1/3 the weight and length of standard countermeasures.
